

Contract Brewing

At Hi-Wire Brewing, we believe that the things that bring us together are stronger than the things that pull us apart. Our mission is to make the things that bring people together—and that includes helping you bring your vision to life.

Contract brewing is more than a service to us; it's a partnership built on quality, creativity, and shared success.

Whether you're scaling up, launching a new brand, or need extra capacity without the overhead, we want to help you grow. With a decade of experience, a lineup of award-winning beers, and a full-scale production facility in Asheville, NC, we can bring your vision to life. We're currently accepting new partners for 2025 and 2026. Let's make something awesome together!
